

VueQuest Technologies UnifiedHD platform – VCCA model F1

Video Control Cloud Appliance with enhanced connectivity – The **VCCA-F1** is part of the VueQuest UnifiedHD platform that provides a complete end to end Video Conferencing solution for Large, medium, and small conference rooms, executive offices, huddle rooms, remote office, and a variety of vertical applications. BigShot-HD USB PTZ Cameras and the LoudN’Clear room based USB Video Conferencing Speakerphone connect seamlessly to the **VCCA-F1**. The **VCCA-F1** is an “always on” dedicated Video Conferencing appliance that allows users to simply click an ICON and go directly to their Cloud Conferencing (LifeSize Cloud® - GoToMeeting® – Zoom® – Webex® etc..) or software based Video Conferencing (Lync®-Jabber® etc..) and Video Streaming applications. Users can only access the specific applications that have been installed eliminating confusion and insuring the VCCA-F1 is used for the applications you require on a dedicated Cloud Appliance.
